

Medical Device Adaptive Carrier "MDAC"

Proper packaging is an integral part of delivering your orthopedic implants and devices safely and securely. Our interchangeable system allows for easier and safer transport.

KEY ADVANTAGES:

- Replaces the traditional molded tote to substantially reduce shipping costs and product damage
 1. Significant weight reduction allows billing for actual weight vs. dimensional weight
 2. No more "special handling" fees
 3. With the cardboard sleeve, your product is required to stay inside reducing water damage and exposure to the outside elements
- Carriers are foldable, requiring less storage space
- Designed for ease of carry and access to products
- Tray inserts fitted to your products keeping them safe
- Provides easier staging and access in the operating room

Easy-carry design case

Trays & Inserts fit securely inside the case

System requires a 44ECT cardboard box to comply with FedEx® and UPS® handling requirements
